

INDUSTRIAL[®] C-245 SERIES

MODIFIED MOLDED BLOCK CARTRIDGES

C-245 Series Modified Molded Block Filter Cartridges offer the same benefits as other modified molded block products while providing even greater chlorine taste & odor reduction and the highest sediment reduction levels found in a carbon cartridge.

C-245 Series Filter Cartridges are modified molded blocks created by use of proprietary Fibredyne™ technology which creates a unique filter media by attaching powdered activated carbon onto a cellulose-free synthetic fiber matrix. The Fibredyne carbon block technology also offers up to two times the chlorine taste & odor reduction and dirt-holding capacity of traditional blocks.

FEATURES/BENEFITS

Up to two times the chlorine taste & odor reduction and dirt-holding capacity of traditional blocks

Combines the benefits of both a sediment filter and a carbon block into a single cartridge

Post-filtration layer fused to the carbon/fiber media blend ensures fines will not be released into the effluent stream

Fibredyne™ technology creates a unique filter media by attaching powdered activated carbon onto a cellulose-free synthetic fiber matrix

Manufactured entirely from FDA-compliant materials

Available in 2.6" (67 mm) diameter

Nominal 5-10 micron rating

APPLICATIONS

- Commercial
- Food Service
- Industrial
- Residential Water

SPECIFICATIONS

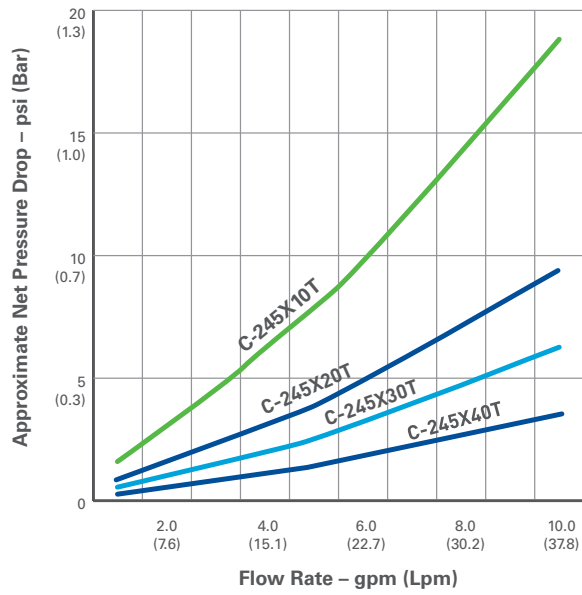

| | |
|--------------|--------------------------------|
| Filter Media | Bonded PAC |
| Encaps | Polypropylene |
| Netting | Polyethylene |
| Gaskets | Santoprene [®] |
| Temp. rating | 40° -180° F (4.4° -82.2° C) |

COMPONENT

Tested and Certified by NSF International to NSF/ANSI Standard 42 for material requirements only.

PRESSURE DROP VS FLOW RATE
